

MCI Project Weekly Time Sheet

Team		7 Student ID		a1785394		Week starting:		24-May	
Day	Date	Time In	Time Out	Total hours	Task	How does it fit to project plan?	Outcome/Next action		
Monday	2021/3/8	10:00:00	1:00 PM	3	unit testing	It is not possible to test a large piece of software at once, so we need to break the software into several units and test them	I tested get_token(), get_group_name(), get_user_name() and get_team() function. They work as precisely we expected. Next I will test other functions.		
Tuesday	2021/3/9	2:00 PM	6:00 PM	4	unit testing	Some key functions like get_shift() should be tested more to make sure the core function would not crash the whole systems.	I tested delte_shift_byID(), search_courses() and get_shift() functions. I found some bugs in the test and I fixed them. Next I will do the system testing.		
Wednesday	2021/3/10	1:00 PM	7:00 PM	6	system testing	While each functions works well when tested individually, we need to make sure that all the functions work together.	Tested the whole software with regular input and output starting from sign-in to delete all incorrect shifts. This includes getting shifts data, getting course data, check the data and delete wrong shifts. Next we will ha		
Thursday	2021/3/11	2:30 PM	4:00 PM	1.5	Meeting with client. Discuss with our team members.	We need to report the progress to our client.	The client told us that this software is basically done, but we need to improve the UI and clean the code. These two things are what I will do next.		
Friday	2021/3/12	6:00 PM	11:30 PM	5.5	Upgrade the UI and appearance of our application.	Our client required us to improve the UI and appearance.	Make use of Bootstrap to unify the software appearance model. I upgrade all the buttons, tables, input form of our web page. The information provided to a user is more straightforward. Next, I will add some useful links a		
Saturday	2021/3/13	12:30 PM	7:00 PM	6.5	Improve the user interface and create a guide page.	It is essential to make our software easy to use for everyone.	Create a guide page to tell the user how to use our application. I also changed the logic of the user interface and added some useful links to the outside website like the course planner and Microsoft Teams. Next, I will
